Remove harmful
chemicals, insecticides &
germs from **Fruits,**
Vegetables and Meat.

KENT VEGETABLE & FRUIT PURIFIER

OZONE PURIFIER FOR VEGETABLES & FRUITS

Experience the purity of Fruits & Vegetables

Need for a Vegetable & Fruit Purifier

Almost all of us wash fruits, vegetables and meat before preparing a salad, consuming them raw or cooking. But, seldom we realise that this is not enough. Fruits, vegetables and meat come to us after they are subjected to extensive use of insecticide, pesticides and other harmful chemicals. Rinsing them with mere tap water does not wash away their residual traces. As a result, we end up exposing ourselves to the adverse effects of these chemicals.

The power of KENT Ozone Technology

Kent Ozone Vegetable Purifier uses Ozone gas with the exceptional power to kill Bacteria, Viruses, Fungus and other pathogens. It sterilizes fruits & vegetables and makes them safe for human consumption. It also helps to clean antibiotics and hormones invariably remaining in meat, fish & other seafoods.

How to use

Simply put the vegetables, fruits or meat in a bowl filled with water & drop the ozone tube into the bowl. Set the automatic timer to 15 minutes or 30 minutes as per requirement and let the ozone gas do the magic. After ozonisation, rinse fruits & vegetables with pure water.

Features

- Suitable for mounting on kitchen wall.
- Sleek & modern design.

Applications

Purifies vegetables, fruits & meat

Effectively oxidises residual chemicals and Bacteria from surface of vegetables & fruits.

Deodorises seafood & meat

Removes residual chemicals and bad odour from seafood & meat.

Enhances the quality of water for bathing

Eradicates Bacteria and other harmful germs present in water thus making ozonised water healthy & good for bathing.

Protects feet

Controls and prevents athlete's foot and ringworm of nails when washed with ozonised water.

Specifications

Product	: Kent Ozone Veg & Fruit Purifier
Model	: TY- 800C
Voltage	: 230V AC 50/60 Hz
Rated power dissipation	: 13Watt
Timer options	: 15 min / 30 min
Ozone output	: 200mg/hr
Size	: L280 W145 H150 mm
Weight	: 1723 gm
Noise	: Less than 45db
Output pressure	: $\geq 0.15\text{kg} / \text{cm}^2$
Operating temperature	: 0- 40 degree C
