KENT TAP GUARD
On-Tap Purifier... with UF Membrane

Fits on all taps

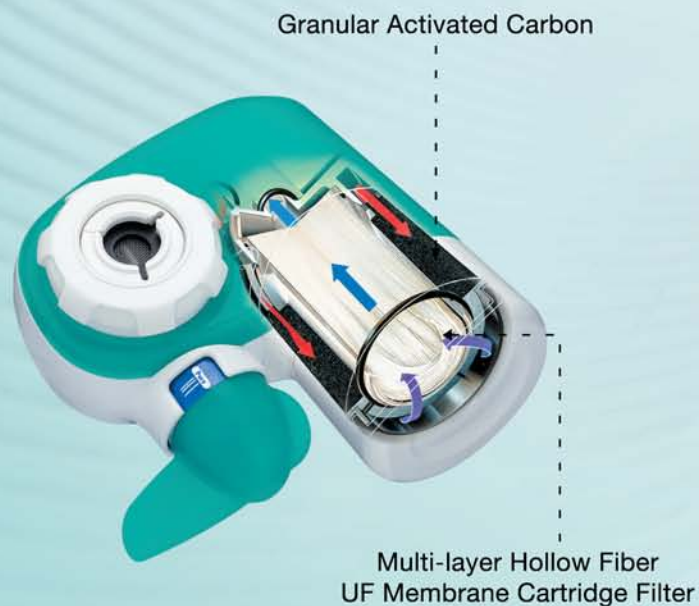

On-Tap Purifier to make even overhead tank water bacteria-free & safe

Need for KENT TAP GUARD

Every morning when we brush our teeth or gargle or splash water on our face and eyes, we expose ourselves to countless bacteria and germs breeding in the overhead tanks. Thus, without even realising, we start our day with a mouthful of bacteria, cyst and other impurities. The salad or fruits we eat too are mostly washed with infected water which puts our health to added risk.

The power of KENT UF Technology

KENT Tap Guard is based on twin purification technology of granular activated carbon and advanced multi-layered hollow fiber UF membrane which traps even the most microscopic contaminants.

Use only genuine KENT SX6 series filter cartridge for replacement

Not recommended for hot water above 50°C

KENT TAP GUARD Advantage

KENT Tap Guard is a result of years of research with Japanese collaboration. Designed on a practical approach to science, it offers you years of trouble-free service. Its advantages include:

- High-grade granular activated carbon, a powerful de-chlorination agent, removes residual chlorine and the unpleasant odour from your tap water.
- Advanced multi-layered hollow fiber UF membrane filter removes rust, bacteria, cyst, coliform bacilli, microorganisms & microscopic impurities from tap water.
- Long life membrane lasting upto 1500 ltrs (six months approx).
- Facility to backwash the membrane which increases the life of filter cartridge.
- Easy availability of genuine spare parts & filter cartridge.

Features

Easy-to-use 3-mode water selection lever

Purified Water

Unfiltered Spray

Unfiltered Straight

Fits on all Taps

- See through window, to check contaminants build-up and find out when it's time to replace the filter cartridge.
