3. Stainless steel body and heating plate for faster boiling.
4. Easy and quick one-touch operation.
5. Safety features like automatic power-off and overheating protection.

KNOW YOUR PRODUCT

ITEMS IN THE BOX

1. KENT Super Egg Boiler : 1 No.
2. Measuring Cup : 1 No.
3. Warranty Card : 1 No.

USING KENT SUPER EGG BOILER

1. Check the unit for damages. Do not use in case of any damages.
2. Before switching on the appliance, make sure that your home's main voltage corresponds to the operating unit.
3. Clean the parts of the Super Egg Boiler thoroughly before using the appliance for the first time [see 'Cleaning & Maintenance' section].
4. Make sure that all parts are completely dry before you start using the appliance.
5. Shut the main power supply after the appliance is auto shut to avoid dry-boiling.

PROCEDURE TO BOIL EGGS

1. Place the Super Egg Boiler upright on a dry, sturdy and flat surface.
2. Fill the provided measuring cup with normal water depending on the desired hardness and the number of eggs, using the respective markings on the measuring cup or as per the table here. For example, if you want 4 medium boiled eggs, fill water cup to the line that corresponds with the medium egg line and the number four. Pour water into the water tray.

Recommended Water Quantity to Boil Eggs

No. of Eggs	Hard (Water Quantity)	Medium (Water Quantity)	Soft (Water Quantity)
1	66ml	40 ml	33ml
2	64ml	37 ml	30ml
3	60ml	34 ml	27ml
4	56ml	31 ml	24ml
5	53ml	28ml	21ml
6	50ml	25ml	18ml

3. Pierce the blunt end of the eggs with an egg needle before boiling, as it prevents the eggs from bursting or cracking during the boiling process.
4. Place the egg-holder on the boiler, and place the eggs. Close the lid once done.
5. Plug into the wall outlet and turn on by pushing the ON/OFF switch. The control light will illuminate.
6. When the eggs are ready, the light will turn off, but the product will have to be manually switched off.

7. If you plan to serve the eggs immediately, switch off the appliance. If you want to keep the eggs warm, leave the appliance on until you are ready to serve them.
8. Remove the egg-holder with the eggs from the water tray and hold them under normal water in case you want to serve them immediately after boiling. Switch off the appliance, otherwise the eggs will continue to boil and become harder.
9. After a short cool-down time of approximately 5 minutes, you may use the Super Egg Boiler again.
10. Unplug the appliance after use.

Caution:

- Use with extreme caution as the stainless-steel lid becomes extremely hot. Always use the handle to remove the lid.
- During use, the steam hole on the top of the lid gets very hot. Do not touch or cover the steam hole when in use.

IMPORTANT SAFETY INSTRUCTIONS

- 1. Please keep the children away when the unit is operating.
- 2. Avoid injuries by the egg needle.
- 3. Place the Super Egg Boiler on a flat surface.
- 4. Do not cover the top lid with any cloth or plate which might prevent steam to come out.
- 5. Do not add the water or pull out the plug when the water on the plate has evaporated.
- 6. Do not touch the heating plate. Doing so might result in an injury.
- 7. Make sure the appliance is completely dry before using it.
- 8. Do not try to service the appliance on your own. Send it to an authorised service centre only.
- 9. To avoid electric shocks, do not use the appliance with wet hands.
- 10. This appliance is suitable for indoor use only.
- 11. Do not try to repair or alter the appliance on your own. It may cause appliance failure or breakdown.

CLEANING & MAINTENANCE

- 1. Always unplug the appliance before cleaning it.
- 2. Wait until the Super Egg Boiler has cooled down sufficiently, before cleaning it.
- 3. To wash, do not immerse the appliance in water.
- 4. Clean and wipe the appliance after every use.
- 5. Deodorise or descaling: Add a few drops of lemon when product is cooled and not in use, then clean it with a moist cloth to remove stain/scales from the steel plate.
- 6. When not in use for a long time, unplug it and store it in a dry ventilated place.
