PURE CLEANING. HEALTHY LIVING.
Revolutionary Bed Vacuum Cleaner • Cyclonic Vacuum Cleaner
TRADITIONAL METHODS OF CLEANING ARE INEFFECTIVE

The way you clean your homes is a major problem. Brushing off the bedsheets and pillows or tossing them in the air leads to air pollution. Your bed might look clean, but Bacteria, Viruses and Dust Mites sharply infiltrate the room and get reabsorbed in beds, pillows, mattress and blankets. Use of traditional vacuum cleaners can be disadvantageous. Installing dust bag every time is a tedious task, moreover these bag release some dust bag in the air which gets reabsorbed in the room. The traditional vacuum cleaner are totally ineffective against Bacteria, Virus and dust mites.

- Airborne viruses cause allergies
- Pollens lead to respiratory problems
- Dust mites in beds trigger asthma
INTRODUCING REVOLUTIONARY
KENT Bed & Upholstery Vacuum Cleaner

It’s time we step up to the threats of indoor air pollution and keep our bedroom clean with the revolutionary HEPA based KENT Bed Vacuum Cleaner. Equipped with Cyclonic technology and with UV disinfectant technology, it is specially designed to effectively clean flat surfaces and eliminate Bacteria, Virus and dust mites, thus ensuring a clean and healthy environment for you and your family.
Cleans with lower dust discharge using HEPA filter
CYCLONIC TECHNOLOGY

KENT Cyclonic Vacuum Cleaners employ the revolutionary Cyclonic Technology to scoop up dust and debris. The Dust from air (Bacteria, Dust Mites and Debris) is sucked at high speed creating a fast-spinning vortex, it uses centrifugal force to separate dust and particles from air flowing inside, and collects them in detachable cylindrical vessel or bin. Unlike traditional Vacuum Cleaners where some of the dust deposits in the bag escapes to pollute the air, KENT Cyclonic Vacuum Cleaners absorbs the dust 100 percent without any infiltration in the air.

This is the new innovative and revolutionary technology from KENT that ensures your indoor air is pure, filling every corner of your home with purity.
UV DISINFECTANT GERMICIDAL LIGHT

UV Disinfectant light uses germicidal UV light—electromagnetic radiation with wavelengths shorter than visible light to disinfect bed and upholstery. Germicidal UV is mutagenic to bacteria, viruses and other microorganisms. It breaks molecular bonds within micro organismal DNA, and kills or neutralizes the organisms. Microorganisms including Dust Mites, Bacteria and Virus have very low defense against UV light and cannot survive prolonged exposure to it.
KENT BED & UPHOLSTERY VACUUM CLEANER
KC-B502 | Powered with Advance Cyclonic Technology and UV disinfectant light

Applications

KENT Bed & Upholstery Vacuum Cleaner is an ideal tool for flat surfaces such as cleaning bed sheets, mattress, pillow and pillow cover, quilts, blankets, couches, sofa seats etc. It uses a twin mechanism of agitator brush & vacuum suction, and ultraviolet disinfection technique to give you a spot less, dust and germ free environment.

Features

- UV light disinfection to kill Bacteria, Virus, dust mites and molds from bed and upholstery.
- Advance Cyclonic Technology (without filtration bags) for dust collection and HEPA (High Efficiency Particulate Arrestor) based discharge filter.
- High efficiency motor with strong suction force for efficient cleaning.
- Highly efficient HEPA filter reduces air pollution due to lower dust and particulate matter (PM) discharge.
- Light weight & Easy to operate.
- Energy efficient & environmental friendly.
- Compact and contemporary design.
Used for flat surfaces:

- Bed Sheets
- Pillow Covers
- Sofa / Couch
Applications

KENT Cyclonic Vacuum Cleaner is an ideal tool for day to day cleaning. With its dual use floor brush, it effectively cleans carpets and hard floors. With its powerful motor and brush, it scoops dust and debris from all corners giving you a spotless, dust-free environment.

Features

- Advance Cyclonic Technology (without filtration bags) for dust collection and HEPA (High Efficiency Particulate Arrester) based discharge filter.
- High efficiency motor with strong suction force for efficient cleaning.
- High efficiency HEPA filter reduces air pollution due to lower dust and particulate matter (PM) discharge.
- Unique Helical 'V' brush technology for increased efficiency of cleaning brush.
- Auto power cord retractor.
- Rubberized wheels.
- Lower Noise.
- Dust container full indicator.
- Compact and contemporary design.
Used for day to day cleaning:

- Floors
- Carpets
- Curtains
List of Accessories

1. Dust Brush
2. Crevice Tool
3. Wide Mouth Brush
4. Floor/Carpet Brush
5. Metal Telescopic Tube
6. Flexible Hose
