Presenting
Range of World's Best
Water Purifiers
Critical need for Water Purifiers

Water supplied by the municipal corporation travels through rusted old pipelines, which are often unclean. The contamination gets worse when the water is stored in dirty overhead tanks, or for that matter, sourced from borewell water that has high TDS level.

Such impure drinking water not only contains pesticides and insecticides, but is also full of harmful chemicals like Arsenic and Fluoride, which can cause acute illnesses like Cholera, Dysentery, Diarrhoea, Jaundice, Tuberculosis and even Cancer.

And herein lies the importance of different types of purifiers whose requirement depend on the quality of water and the place from where it is sourced. All in all, it is very important that we ensure water is treated and 100% purified before we drink it.

World's best
WATER PURIFIERS

Protect your family with 100% pure water

KENT has a wide range of water purifiers to meet the requirements of all types of water consumption. It comes with the patented technology of RO+UV+UF+TDS Controller, which purifies water while retaining natural minerals.

The revolutionary Multiple Purification Technology of RO+UV/UF removes the dissolved impurities and makes water 100% pure. The Zero Water Wastage Technology™ ensures that the wastage of water is altogether eliminated.

Unique features like the digital display of purity to track the performance parameters of the device and the UV-LED light protection in the storage tank to keep the purified water pure, are in place to address your exclusive requirements.

RO Purifiers, UV Purifiers, Gravity Purifiers, Commercial Purifiers, Water Softeners, Health Plus.

Millions trust
ONLY KENT

When it comes to purity, KENT enjoys the trust of millions across the world. The quality of KENT’s ‘safer-than-boiled water’ earned the prestigious recognition of Indian Medical Association.

KENT ROs are known to meet the stringent quality standards set by the world's most prestigious water quality testing laboratories, such as WQA (USA & India) and the NSF (USA).

As per the Brand Trust Report 2015, 2016 & 2017, KENT RO is the most trusted water purifier brand in India. It is also one of the largest range of RO purifiers and comes with excellent after sales service.

KENT RO Purifiers have been recently awarded Water Digest Water Award 2016-17 by UNESCO. It is the only brand in the world which gives 1 year warranty +3 years extended FREE service.

KENT UV
WATER PURIFIERS

With Next-Gen UV Technology
KENT’s Next-Gen UV+UF purifier +UV disinfection in tank features have been designed considering the problems faced by people with conventional UV purifiers.

Water with TDS levels up to 100mg/litre may only require disinfection from bacteria & viruses. In such case, inline UV purification combined with UF purification is sufficient to remove bacteria & viruses.

Further, UV LED light disinfection in storage tank ensures purified water remains pure in storage tank. Be it tap, overhead tank or underground, water from any of these sources can be purified to bottled water quality.

To ensure delivery of purer and healthier water, a micro-processor is installed in the purifier that has computer-controlled Filter Change Alarm and UV Fail Alarm.

The KENT Advantages
Double Purification - 100% Pure Water
UV/UF purification with ultra-violet disinfection system for 100% pure water.

Removes Bacteria, Viruses & Cysts
UF purification after UV ensures that bacteria gets trapped & the purified water is 100% pure.

Purified Water On Demand
Purified water is stored in tank and is available on demand.

Keeping Purified Water Pure
UV LED Light protection in storage tank to keep purified water pure.

KENT, as a brand, believes in every individual’s right to health. And it’s this conviction that inspires us to make pure water available for all.

People staying in rural areas are often the ones most affected by contaminated water, and to make matters worse, many villagers still don’t have access to electricity. High-end electric water purifiers are out of their reach hence; non-electric water purifiers come as a perfect solution to fight water contamination. To bring purity within the reach of the rural areas and people under lower income group, KENT has come up with KENT UF Water Purifiers that can work without electricity to sanitize tap and municipal corporation water, and make it better than boiled water without the use of chemicals.

Most offices and public places serve water stored in plastic jars and bottles as pure drinking water. While the quality of such water may be questionable, it generates plastic waste that’s harmful for our environment.

Moreover, replacing the jars is both tedious and expensive in the long run. With KENT Next-Gen Commercial Water Purifiers, all these problems can now be addressed at once.

With the cutting-edge RO+UV+UF+TDS Control patented technology, these commercial RO purifiers purify the drinking water and removes even dissolved impurities, bacteria and viruses, while letting it retain the essential natural minerals.

Designed to cater to larger number of people, they come with high purification capacity from 20L/hr. to 100L/hr. These purifiers also come with a condenser that makes chilled and purified water available at all times.

Keep Your Hair & Skin Healthy with KENT Home Water Softeners

Hard water has excess minerals such as calcium and magnesium that brings along a whole host of problems every day. We are mostly helpless as water, with very high mineral content dries our skin and hair, makes our clothes turn paler and wears out our appliances.

KENT’s range of Home Water Softeners are designed to resolve your daily hard water problems and come along with the KENT promise of smooth performance. Now to protect your hair, skin and clothes from hard water, choose the product that best suits your requirements and enhances the quality of your life naturally.

KENT Automatic Water Softener
KENT Bathroom Water Softener
KENT Washing Machine Water Softener
KENT Sand Filter
KENT Iron Removal Filter
KENT HOME WATER SOFTENERS SOLUTIONS

Water softeners, from KENT use innovative technology that come with non-electric Automatic Regeneration Technology eliminating the time-consuming and inconvenient manual regeneration process.

KENT Auto Water Softener comes with LCD screen that displays the regeneration status, the date of the last regeneration, and other such vital information. Their sleek and trendy design will make sure that the aesthetics of your bathroom doesn’t get disturbed. The use of high quality resin ensures the longevity of the device and the reduction in pressure drop makes it certain that full flow of water is maintained.

With problems that come along with hard water addressed, you can now feel the soft touch of purity, every time you use water for bathing or washing.

FEATURES

**Automatic WS 40/25 L**

For Whole House Installation

- **Water Softened Before Regeneration**: 5500 L (Water TDS 500 ppm)
- **Resin Volume**: 40/25 L
- **Ideal Place for Installation**: Whole House at Overhead Tank

**Bathroom WS**

- **Water Softened Before Regeneration**: 1200-1400 L (Water TDS 500-1000 ppm)
- **Resin Volume**: 5.5 L
- **Ideal Place for Installation**: Flats & Individual Bathrooms

**Washing Machine WS**

- **Water Softened Before Regeneration**: 500-600 L (Water TDS 500-1000 ppm)
- **Resin Volume**: 1.75 L
- **Ideal Place for Installation**: Washing Machines

**SOFT WATER**

- Makes your hair & skin healthy
- Produces more lather
- Enhances whiteness & luster of clothes
- Reduces soap and shampoo consumption
- Increases life span of your appliances
- Reduces water consumption
- Reduces soap and shampoo consumption
- Increases life span of your appliances

- Produces more lather
- Reduces soap and shampoo consumption
- Enhances whiteness & luster of clothes
- Increases life span of your appliances

**Healthy Hair Healthy Skin**
Protect Your Health with BACTERIA & VIRUS FREE WATER ON YOUR WASH BASIN

Features

- Best to fit under the wash basin/sink
- Get protection from harmful micro-organisms like bacteria & cysts
- Compact design, easy to install
- Ultra Filtration with pore size of 0.01 microns
- Low pressure drop

UF Membrane Technology

Health Plus is based on UF Membrane Technology that has an advanced multi-layered hollow fibre UF membrane, which traps even the most microscopic contaminants and filters out bacteria and cysts.

Ultrafiltration (UF) uses standard home water pressure to push water through a semipermeable membrane and remove any contaminant.

UF is ideal for the removal of colloidal particles of 0.01 microns, proteins, bacteria, pyrogens and macromolecules, larger than the membrane pore size, from water and some of the largest dissolved contaminants. Suspended particles that are too large to pass through the membrane stick to the outer membrane surface. Only fresh water and dissolved minerals pass through.
Protect Your Health with BACTERIA & VIRUS FREE WATER ON YOUR WASH BASIN

Use Bacteria & Virus Free Water For

- Brushing Your Teeth
- Washing Fruits, Vegetables & Meat
- Washing & Rinsing Your Mouth

Features

- Best to fit under the wash basin/sink
