INDICATOR LIGHTS

There are 2 operation modes-single spray mode & double spray mode. These modes can be activated by pressing respective buttons.

- Green light: single spray
- Red light: double spray

Note: Sensing Distance: 8-12cm

CLEANING & MAINTENANCE

- After starting to use the machine, if it is left unused for many days, the evaporation of water in the pipeline will cause the sanitiser to coagulate, which will have a certain impact on the pump. It is advised to store the sanitiser bottle separately from the machine
- If the machine has not been maintained for more than 3 months, then the pump may not function properly in such case remove the bottle, open the cap, and pour warm water around 40°C into the bottle. (warm water at about 40°C has a better chance of dissolving the sticky stuff in pipes). Put the liquid bottle back on the machine and start using it as usual until water comes out of the outlet. Repeat 10-15 times for better results

IMPORTANT SAFETY INSTRUCTIONS

- Do not place the product on places that are subject to vibration or shock, such as on a wobbling table or an unstable tilted place
- Do not bump, apply excessive force, or scratch. It may cause damage
- Do not wipe the main unit with thinner or benzene. It may cause deformation or discoloration
- Do not install the product in a place close to fluorescent lamps expose it to strong light. It may cause malfunctioning
- Make sure that the sensor unit is not exposed to liquid. The sensor may stop responding. In case you choose not to use the unit for an extended period of time, empty the container of sanitiser
- In case of no use, clean the dispenser and remove the batteries. Store it in a dry place
- Sanitiser works best with this sanitiser dispenser

Battery Safety

- Do not mix the old batteries with the new ones
- Do not use rechargeable batteries as it may affect the proper functioning of the unit
- Please remove the batteries if the unit is not being used for a long time
- Batteries are small objects and must be replaced by an adult
- Use appropriate batteries, 4 Nos. C 1.5V Batteries
