Introduction

We, at KENT have always believed that a clean and healthy life is the right of every individual. This ethos made us embark on the journey to develop innovative solutions for purifying water, fruits & vegetables and air. With the use of an innovative technology and supported by a competent service network, we have been able to create a brand, which has become synonymous with well-being and health.

Continuing with the tradition, we now present the KENT Wet & Dry Vacuum Cleaner 30L, with state-of-the-art technology & feature to pick wet spills and dry dirt to provide clean, dust-free and spotless surroundings.

KENT Wet & Dry Vacuum Cleaner 30L, do not use filtration bags, unlike traditional vacuum cleaners available in the market. The dust and wet spills is collected in a stainless steel body with a 30 L capacity for easy disposal of waste.

Important Instructions

1. Do not operate the vacuum cleaner too close to heaters, radiators, cigarette butts, etc.
2. Do not plug or unplug the device with wet hands.
3. Before using the vacuum cleaner, remove large or sharp objects from the floor in order to prevent damage of the HEPA filter.
4. To unplug, do not pull the electrical cord, instead pull out the plug.

Note: If the suction pipe or extension tube is blocked, switch-off the vacuum cleaner at once. Unplug the appliance and clear the blockage. Once done, start the vacuum cleaner again.

Cleaning and Maintenance

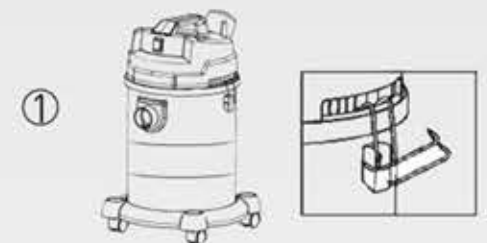

1. Switch-off and unplug the appliance before cleaning it.

Note: Never use gasoline, solvent, abrasive cleaning agents, metal objects or hard brushes to clean the appliance.

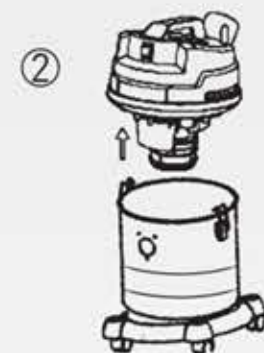

2. Cleaning Filters: Your KENT Wet & Dry Vacuum Cleaner comes with a washable foam and HEPA filters for effective dry and wet cleaning.

Removing and cleaning washable foam and HEPA filter

1. Remove the upper body assembly by opening the lock attached to the main body.

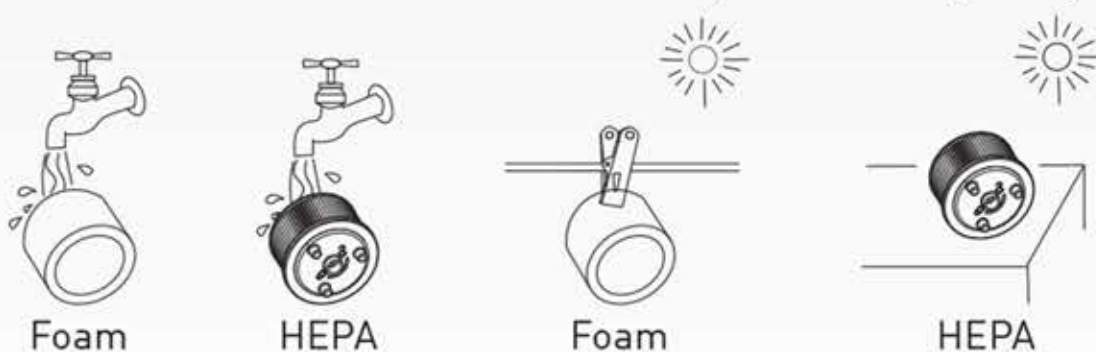

2. Gently pull the upper body to detach it from the main body.

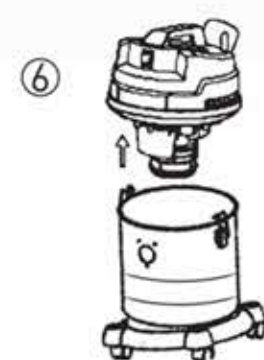

3. Gently remove the filter cartridge by rotating and pulling it out.

4. Detach the HEPA filter from the outer foam filter by pulling it out.

5. Rinse filters in lukewarm water and dry them completely.

6. Once the filters are dry, put them back in reverse order.

7. Filters should be cleaned at least twice in a year, or when it becomes visibly soiled.
8. Always operate the appliance with filters installed.
9. Always unplug the appliance before cleaning the filters.
10. Do not use washing machine to rinse filters.
11. Do not use a hair dryer to dry it.

Storage

- If you do not intend to use the appliance for a long time, store it carefully.
- Plug out the appliance when not in use.
- Keep the appliance out of the reach of children.

Important Safety Instructions

When using an electrical appliance, basic precaution should always be followed, including the following:

1. Do not leave vacuum cleaner switched on when plugged in. Unplug, when not in use and before servicing.
2. Use the appliance only as described in the manual.
3. Always use manufacturer's recommended attachments only.
4. Do not use the appliance if the cord or plug is damaged or worn out. Replace the damaged cord or plug immediately.
5. Do not try to service the appliance on your own. Send it to an authorized service center.
6. Never use the cord as a handle, close door on cord, or pull cord around sharp edges or corners. Keep the cord away from heated surfaces.
7. Do not unplug the appliance by pulling the cord. Always unplug by pulling the plug out the cord.
8. To avoid electric shocks, do not use the appliance with wet hands.
9. Keep hair, loose clothing, fingers and all parts of body away from moving parts.
10. Turn off all controls before unplugging.
11. Use extra precaution while cleaning stairs.
12. Do not use the appliance to pick any flammable or combustible liquids, such as gasoline, and also do not use in the areas where they may be present.
13. Unplug before connecting the hose.
14. Do not pick up anything that is burning or leaving smoke, such as cigarettes, matches, or hot ash.
15. Never use the appliance without the filter in place.
16. If the supply cord is damaged, it must be replaced by the manufacturer or a service agent, or a similarly qualified person, in order to avoid a hazard.
17. This appliance is suitable for indoor use only.
18. Keep away from the reach of children.
19. The appliance is not designed to be used by people who are physically or mentally disabled, mentally handicapped or lack the relevant experience and knowledge, unless a person responsible for their safety uses the product with supervision and guidance.
20. When there is water in the dust barrel, the float will be rise and the appliance would stop working. In addition you can hear abnormal sound. The power supply haven't been cut off yet at that time. So cut off the power supply immediately. And spill the water in the barrel. Restart the machine.
21. When the vacuum is overturned, the float will rise. In that case, cut off the power supply and upturn the vacuum.
22. If you run the vacuum or leave it alone while the float is risen, it may damage the motor and lead to fire.
