KENT Vegetable Disinfectant

Clean Vegetables & Fruits
Removes Bacteria, Viruses & Chemicals
Based on Ozone Technology to Disinfect
KENT Vegetable Disinfectant

Vegetables and Fruits are sprayed with pesticides and chemicals in farms, which continue to persist on their surface. They are also handled by hands in market places that may carry viruses. Simply washing them doesn't remove these harmful chemicals. Presenting Next-Gen KENT Vegetable Disinfectant based on Ozone Technology, which cleans fruits and vegetables completely and makes them free of harmful chemicals and viruses.

No Consumables Required

• Does not use any consumables for producing Ozone. It simply uses oxygen present in the atmosphere to produce Ozone
• Works on bio-friendly Ozone Technology which helps in disinfection

Cleans & Disinfects

• Removes virus and bacteria, insecticides, pesticides and chemicals from fruits, vegetables and meat
• Removes pathogens, germs and smell from meat
• Removal of bacteria from the surface of fruits & vegetables, keeps them fresh and also increases their shelf life

Process

Fill up the bowl with vegetables & fruits  
Put the nozzle and start  
After disinfection, wash fruits & vegetables with clean water
